

TECHNICAL DATA SHEET

General Information

Gutter Protection Systems (MJM) ("GPS") gutter guard products are proudly manufactured in Australia using Bluescope COLORBOND® steel sheet. All our products are manufactured under an internal quality management system in accordance with ISO 9001. We are proud to say that our gutter guards are the most advanced in Australia.

Raised expanded metal, comes off our expanding machine setting the strands and knuckles at a uniform angle to the plane of the sheet metal. Strength is also added along with rigidity, which in turn allows air circulation.

Raised Expanded Metal

"A" Overall thickness. "B" Strand Width. "C" Strand Thickness.

Materials

- BlueScope COLORBOND® steel sheet is available in 22 standard colours.
- AS 1397:2011 Grade 300 AM100 Corstrip 0.55mm
- Gutter Protection Systems is an Australian brand partner of BlueScope steel who supplies our raw materials used in production.
- Aluminium: 5005-H34 0.80mm Mill Finish

Material Specifications

PRODUCT CODE	STANDARD SHEET SIZE		THICKNESS (MM)	STRAND WIDTH (MM)	NOMINAL PATTERN SIZE		FREE AIR SPACE (%)	MASS (KG/M ²)	KNUCKLE WIDTH
